CUSTOMIZED SPACES FOR EVERY MOODS

The new homogeneous Premium Collection has been designed to fulfill all your expectations. You can create different moods and environments by mixing patterns and colours. The Tarkett Premium Collection, Eclipse, Primo, and the new range Spectra, is the most functional vinyl flooring solution in non-directional patterns. Its high resistance to chemicals, stains and heavy traffic is particularly adapted to schools, health care facilities and other types of public buildings.

ECLIPSE PREMIUM SPECTRA COLLECTION

The new Premium Spectra brings pastel and bright colours along with a unique modern style. It helps you to create an inspiring atmosphere, full of energy. Its low contrasted pattern with few accents is the perfect bridge between our Primo and Eclipse collections.

New design

This new pattern supports your creativity. It offers multiple possibilities for a perfect mix and match.

12 brand new colours

These new colours are the best choice to highlight a specific area or to design soothing and modern spaces

COMBINE & CREATE

Premium is the perfect collection to customize spaces due to its versatility and wide range of colours and patterns. Combine floors to imagine new styles and play with shades to create different atmospheres.

A brand new pattern

 Now 4 patterns to choose from, for unique combination options and a complete aesthetic. Play with highly contrasted patterns for the most demanding areas and patterns with less contrast and few accents for quieter ones.

Available in rolls and tiles, you can play with multiple shapes and formats.

- Tiles : 61 x 61 cm
- Tiles : 30 x 30 cm
- Rolls : 2 m wide

Colour your world

Choose from a world of colours and coordination possibilities in line with evolving user needs and lifestyle trends.

.102 Colours **.50%** new

Multicoloured and Uni welding rods

Unique multicoloured welding rods give the most realistic and seamless look when installed.

ALL YOUR NEEDS COVERED

The Premium range is a global solution combining attractive design and functional performance, with options available to cover all your needs.

Attenuated noise

By absorbing noise, Tarkett acoustic floorings take the edge off busy environments and encourage quiet interaction.

Eclipse Acoustic combines acoustic properties and underfoot comfort with the low cost and simplified maintenance of Eclipse Premium.

For underfoot comfort we have tested Eclipse Acoustic for: indentation under static loading (measured after 15 s under load in accordance to ISO 24343-1) to be $\geq 0,40$ mm.

Eclipse Acoustic (Spectra colours)

Eclipse Acoustic is available in the 12 Spectra astonishing new colours.

The foam underlayer provides up to **17dB** impact sound reduction and walking comfort.

No slipping

Primo Safe.T is a homogeneous vinyl safety flooring with anti-slip particles throughout its thickness which assures continued surface grip during the products entire lifetime. The surface is strengthened and made easier to maintain by Safety Clean XP, a photoreticulated polyurethane treatment.

Primo Safe.T, **R10** grip, is available in 15 core matching colours.

©21013792

Static Dissipative

Primo SD, the static dissipative option is available in 8 core matching colours.

RESISTANCE, HYGIENE AND EFFORTLESS MAINTENANCE

PUR treatment reinforces durability

and makes the surface more resistant to heavy traffic and easier to clean.

Traffic resistance

Premium is specifically designed for heavy traffic zones where hygiene and resistance are critical such as schools, hospitals and public buildings.

- Residual indentation **0.03 mm***

*Best measured value

Practical hygiene & maintenance

No additional surface treatment needed.

Premium benefits from PUR reinforcement which simplifies cleaning and maintenance.

Impenetrable heat welding joints.

Impervious surface for maximum hygiene.

Premium collection offers highly flexible flooring solutions for perfect coving results, ensuring an easy and improved maintenance.

Joints resist tearing when stretched using over 400N of force per 50mm

PUR Reinforced chemical resistance.

Eosin 1% in Ethanol - 2 hours' exposure after cleaning with heavy-duty, spray-and-wipe power cleaner.

Competitor A

Eclipse Premium

DOING GOOD. TOGETHER

At Tarkett, we strive to support both our professional clients and consumers in creating healthy, beautiful and sustainable living spaces. Working with industry partners, we're bringing our best thinking and efforts toward making a positive impact on people and the planet.

Designing for life

Developing products based on Cradle to Cradle® principles that contribute to people friendly spaces AND respect the planet's natural capital.

Healthy spaces thanks to 100% phthalate-free product

Good indoor air quality

Through low levels of total volatile organic compounds (TVOCs) - TVOCs $\leq 10 \mu\text{g}/\text{m}^3$, much lower than EU standard EN ISO 16000.

We have been proactive in seeking alternatives to phthalates as they have been the subject of scientific debate about their potential impact on human health.

Since 2010, we have developed the use of a phthalate-free plasticizer technology for our vinyl floors which is approved for food containers and toys intended to be placed in the mouth by children.

Closing the loop

Building a circular economy inclusive of programs and business models that encourage take-back, recycling, reuse and elimination of waste.

Premium Collection is eligible to ReStart®, Tarkett's take-back program which can help customers manage their installation waste while ensuring it is recycled.

We're committed to a circular economy where resources are continually reused and recycled—creating products today that become the raw materials

of tomorrow. Premium Collection contains over 25% of recycled material.

Driving collaboration

Inviting others to join us in Doing Good through education, collaboration, transparency and communication.

INSTALLATION INSTRUCTIONS

STEPS IN INSTALLATION

1. Subfloor control

- The subfloor must be clean, hard, flat and free from all types of marks, debris & residues, and not exposed to humidity.
- Damp proofing to be carried out according to local building standards. -When installing this product on concrete subfloors that do not include damp-proofing, the moisture content measured in terms of relative humidity must not be higher than 85% (in UK and Ireland 75% according to BS 8203). Or less than 2% with CM (Carbide Method).
- Refer to local standards for detailed rules and control methods.
- Stop underfloor heating for minimum 48h before installation and maintain the temperature in the room with an alternative heating source. Remain turned off for 6-7 days and then ramped up.

in the premises should be 35-65%. Maintain same temperature and humidity for at least 72 hours after installation.

- If material from several rolls is used, they should have the same manufacturing serial numbers and be used in consecutive order.

3. Rolls installation

- Cut the sheets to length and lay them out to acclimatise and relax prior to installation. This is particularly important for longer lengths.
- Sheets must be installed so that colour differences are avoided. Reverse sheets whenever possible, overlap and cut edges.

4. Hot welding

- The sheets are hot welded. Do not weld until the adhesive has bonded completely, wait 24-48h. The joints are chamfered or grooved to about $\frac{1}{4}$ of the thickness using a hand grooving tool or machine prior to welding.
- Weld with hot-air and Tarkett Speed Welding Nozzle. Welded seams must cool to room temperature before trimming in two steps, rough and fine trimming

5. After installation

- Always protect the floor with thick paper, hard board or similar during the construction period. If using tape, this must not be applied directly to the floor surface.

- IMPORTANT! Restrict foot traffic for 24 hours after installation. No heavy traffic, rolling loads or furniture placement for 72 hours after installation. Most suppliers of floor adhesives specify 72 hours before the final strength is achieved."

2. Before installation

- Store the rolls upright in a safe position with distance between the rolls.
- Prior to laying, allow the material, adhesive and subfloor to reach room temperature, i.e. a temperature of at least 15°C. The relative air humidity should be 30-60%. Rolls must be stored indoors at least 24 hours before installation, preferable 48 hours.
- Installation should be carried out at room temperature between 18°C to 26°C. Subfloor temperature must be at least 15°C. The relative air humidity

For more detailed explanations, or specific installation methods (tiles installation, wet room concept, cove forming), please refer to full installation notice. Please contact your local representative for any questions. Tarkett accepts no liability for adhesives and levelling compounds used, including those recommended.

TENDER SPECIFICATION

Eclipse Premium

The selected flooring similar to Eclipse Premium belongs to the compact vinyl floors category under the ISO standard 15081, available in 2m wide sheet with a Binder Content of Type I.

The product formulation does not contain phthalate based plasticizer. The product is a pressed homogeneous vinyl flooring and contains over 25% of recycled material.

The product is reinforced with a UV photo crosslinked polyurethane, X-treme Reinforcement xr™, which suppresses any wax and regenerating polish spray maintenance operations.

The product is installed with multicolour welding rods to ensure seamless finish.

Its emission rate of volatile organic compounds in air is very low, measured after 28 days according to EN 16516 standard. Close to zero emission (quantification limit), **TVOC, TSVOC and formaldehyde emissions are below than 10 µg/m³**.

It is free of formaldehyde and **100% REACH compliant**.

It is 100% recyclable and installation off-cuts can be collected and recycled in the products through the Tarkett ReStart® program.

Eclipse Premium comes with a **10 Year Warranty**.

Primo Premium

The selected flooring similar to Primo Premium belongs to the compact vinyl floors category under the ISO standard 15081, available in 2m wide sheet with a Binder Content of Type I.

The product formulation does not contain phthalate based plasticizer. The product is a pressed homogeneous vinyl flooring and contains over 25% of recycled material.

The product is reinforced with a UV photo crosslinked polyurethane, X-treme Reinforcement xr™, which suppresses any wax and regenerating polish spray maintenance operations.

The product is installed with multicolour welding rods to ensure seamless finish.
